

CREATIVECEEJAY WEBDESIGN

First, I would like to thank you for your interest in our services, we promise to provide you with AAA websites, and we look forward to creating with you! We would like to welcome you to the family and don't forget to share our page to help the business grow! A discount code will be sent to you for each referral who books with us!

AGREEMENT

Below you will find the agreement details, as well as Pricing Plans that we have available.

I have broken down the reasoning behind the set rate that we require for our Website plans, we've created a few options for you to choose from in case the budget is tight.

BREAKDOWN

- **Domain Name:** \$10 - \$30 (this allows you to have a unique URL to send to your friends and family, etc.) Ex: creativeceejay.com
- **# of Pages:** \$50-\$200 (\$50 being a 1-page static website and \$100 being more than 4 pages but still static. Static means that it does not shrink to fit mobile, it will display as a web browser website).
- **Fully Responsive/Mobile Support:** \$100 - \$200 (with this your website will be fully responsive and support mobile phones and tablets. This means that the website will fit to all devices and shrink to the required screen size to showcase a more sophisticated and professional website. People will not have to zoom in and out of the page as everything will resize to fit the device).

- **Video/Audio Support:** \$25-\$50 (with this feature you will be able to showcase videos and photos as well as audio material that you have shot and created. We are able to add in galleries, slideshows, animated booklets that allow users to sort through and see pictures, as well as media playlists).
- **Web Hosting:** \$150-\$300 (We recommend Blue Host - <https://www.bluehost.com/> this is a top hosting service at the moment and offers really great services and high-quality plans).
 - **Why do you need a web host?**
 - A web hosting service is a type of internet hosting service that allows individuals and organization to make their website accessible via the World Wide Web. Web hosts are companies that provide space on a server owned or leased for use by clients, as well as providing internet connectivity, typically in a data center.
- **Timescale:** \$50-\$250 (this is determined by the length of the website (# of pages, sub-pages, navigations, sub-navigations, etc.) that the consumer would like for the project. A typical website takes anywhere from 6-8 hours to complete, that is roughly 3 pages of code (\$100).

PRICING PLANS

Keep in mind that the prices below are not calculated with the breakdown above, below is industry standard prices for the templates stated

- **One-Page static website (\$100)**
 - Commonly used as a landing page, simple and quick to the point on what the business or personality is offering to consumers. Contains single or columns of texts, images, social media links, and a contact section.
- **One-Page responsive website (\$150)**
 - Similar to the plan above but it will be responsive and support mobile/tablets, like a mobile application that you install.
- **Multi-Page static website (\$150)**

- Get up to 3 pages allowing for a broader view of things, and not all of the information crunched on a single page. This is another common design feature as it allows businesses to have a Home Page, About Us Page, and a Contact Page to tailor information on.
- **Multi-Page Responsive website (\$200)**
 - Similar to the plan above, 3 pages, but the website will be fully responsive to support all devices (mobile, desktop, and laptop).
- **Complete Package (\$499)**
 - With this package you become a premium member with us, we offer unlimited web pages, and full responsiveness. You will also get lifetime support and updates to your website as your business grows and changes come to mind for the design. We cover the cost of the domain name, as well as the hosting service, which discounts up to **\$180.00**.
 - Check out our recent project covering the complete package:
